2. System Architecture Diagram

Backend Layer (Firebase)

Cloud Firestore & Role-Based Access Control

3. Technology Stack

Category	Technology Used
Framework	React.js (Vite)
Styling	Tailwind CSS
Database	Google Cloud Firestore
Security	Firebase Authentication

4. Project Summary

The Goal Tracking Portal is a comprehensive solution for organizational goal management. Key features include a weightage validation system ensuring 100% allocation, real-time data persistence, and a multi-role workflow. Managers can review employee submissions, leave feedback comments, and approve/reject goals to ensure team alignment.
